◎ Data driven
◎ POM
◎ Junit
◎ TestNG
◎ BDD
◎ Cucumber
◎ Manual Test
◎ Test cases
◎ SDLC
◎ UML Design
◎ ERD Diagrams
◎ Storyboard

WORK SUMMARY

Company	Position	Dates
Indsafri	QA Engineer Intern	Oct 2024 – Current
Intelliscient Technologies	Automated Software Testing Intern	Aug 2023 – Sep 2024

WORK EXPERIENCE

Indsafri
QA Engineer Intern
Oct 2024 – Current

Responsibilities:

◎ QA Fundamentals: Learned the basics of QA, SDLC, and STLC, covering detailed phases, levels of testing, and test scenario identification.
◎ Test Design: Gained hands-on experience in test design techniques, test case creation for web applications, and test case enumeration.
◎ Agile & Tools: Worked with Agile methodology, Jira for test mapping and updating, and user stories for test management.
◎ Testing Types & Execution: Covered various testing types, test execution, and the bug lifecycle. Performed end-to-end testing for web applications.
◎ Basic Java & Selenium: Developed Java skills including control statements, methods, objects, arrays, and strings. Gained expertise in Selenium WebDriver, browser actions, XPath, and test script development.
◎ Advanced Selenium: Worked with advanced features such as Actions class, JavaScript Executor, and DevTools, focusing on web tables, calendars, and target locators.
◎ Rest API Testing: Introduced to RESTful API testing using Postman, Swagger, and integration with Jenkins and Rest Assured. Also worked with mocking services and tools like Wire Mock.
◎ Boosted product quality by designing and executing comprehensive QA testing procedures.
◎ Drove team efficiency by introducing testing methodologies, streamlining the testing process.
◎ Mentored and trained as QA engineers on best practices and advanced testing technologies by Test-Leaf, significantly enhancing the team's overall capabilities.

Reason for leaving: Training or Internship coming to an end.

- ◎ Visual Studio
- ◎ GitHub
- ◎ IntelliJ
- ◎ System Analysis
- ◎ System Development
- ◎ Database Design

Intelliscient Technologies
Automated Software Testing Intern
August 2023 – September 2024

Responsibilities:
- ◎ Optimized test coverage by maintaining a well-organized and up-to-date library of test cases, ensuring alignment with evolving application requirements.
- ◎ Employed specific testing methodologies and tools to enhance test efficiency, improve defect detection, and ensure comprehensive software quality throughout development cycles.

Reason for leaving: Contract of internship ended.
